

(a)

A 35-year-old patient has upper-limb pain. What's the most likely diagnosis?

Where is the pain worst: **forearm or elbow, wrist, or hand**?

Hand.

Do the **fingers change color** when exposed to cold?

No.

When the finger bends or straightens, is there **clicking or catching with pain**?

Yes.

This pattern is most consistent with **trigger finger**.

Answer

Degree of Underspecification

Instruction (predict k)

How many variables must be asked, at minimum, to uniquely determine Y ?

A.0 B. $k=1$ C. $k=2$ D. $k=3$ E. $k=4$ F.Unsure

Metric

- Accuracy: $1[\hat{k} = k]$
- Under-estimation: $1[\hat{k} < k]$
- Over-estimation: $1[\hat{k} > k]$

Missing Variable Identification

Instruction (select suff. variables)

Select exactly k variables from candidates that are sufficient to determine Y .

Metric

- Exact-match Accuracy: $1[\hat{S} = S^*]$
- Jaccard Similarity
- Recall

Sequential Task-Solving

Interaction (multi-turn)

Turn 1: Ask $X_2 \rightarrow$ Oracle: x_2

Turn 2: Ask $X_3 \rightarrow$ Oracle: x_3

...

Turn t : Stop. Predict $\hat{y}$

Metric

- Final Sufficiency & Answer Accuracy
- Query Coverage, Order Correctness
- Question Quality

(c)

Constraint Satisfaction Problem

Constraints (C) Observed assignment ($\mathcal{A}$) Target variable (Y) Min. sufficient set (S)

k -Underspecified
